Professional Summary

Application Support Analyst with 4+ years of experience delivering Application Management Services (AMS) for enterprise environments supporting Australia's retail and oil & gas industries. Experienced in L2 application support, Windows Server administration, user access management, SAP OpenText VIM, ServiceNow, Azure, ITSM and ITIL-aligned processes, production support, and vendor coordination. Skilled in troubleshooting business-critical applications, implementing production changes, maintaining system availability, and supporting enterprise ERP environments. Currently expanding expertise in Agentic AI, AI-assisted solutions, and emerging AI technologies through formal learning and certification.

Skills

Application Support:

Application Management Services (AMS) • L2 Application Support • Enterprise Application Support • Production Support • System Troubleshooting

Microsoft Technologies:

Microsoft Azure • Microsoft SQL Server • Windows Server Administration • Power BI (Basic)

IT Service Management:

ServiceNow • ITIL Incident, Problem & Change Management • User Access Administration • Vendor Coordination

Enterprise Systems:

SAP OpenText VIM • Application Monitoring • Confluence • Technical Documentation

AI & Emerging Technologies:

Agentic AI • AI-Assisted Solutions • AI Agents & Agentic Workflows • Generative AI • AI Technology Fundamentals

Technical Exposure:

C# (.NET) • ASP.NET • HTML/CSS • JavaScript • Microsoft Visual Studio

Engineering Software:

AutoCAD Electrical • SketchUp

Experience

Accenture, Inc. | BGC Taguig, Metro Manila

Application Support Engineer (Client-Facing Role) | Oct 2024 – Present

Official Position: Software Engineer → Packaged App Development Analyst

Application Support Engineer / L2 Application Support | Jul 2022 – Sep 2024

Official Position: Associate Software Engineer

Client: Major Australian Oil & Gas Exploration & Production Company

October 2024 – Present

Promoted to Packaged App Development Analyst – September 2025

- Provide L2 Application Support / AMS for business-critical enterprise applications, handling incidents, service requests, changes, and production issues using ServiceNow, following ITSM and ITIL-aligned processes.
- Perform daily morning and afternoon application/server health checks, monitoring system availability, services, logs, and alerts to proactively identify issues.
- Support SAP OpenText VIM, application integrations, monitoring, troubleshooting, testing, and production validation.
- Manage Windows Server administration, including patching, security remediation, health monitoring, service management, and system upgrades.
- Assisted with application decommissioning activities, including system shutdown coordination, validation, cooling-period monitoring, and server retirement.
- Supported an enterprise application upgrade, coordinating implementation activities, functional validation, and post-upgrade checks; successfully completed with no reported issues.
- Implemented an emergency Application token password renewal, restoring compliance within 4 hours and mitigating potential P2 impact.

- Contributed to service delivery by resolving 76.92% of incidents, implementing 38.46% of changes, and completing 43.36% of service request tasks across supported applications within the Team.

Client: Major Australian Retail & Supermarket Company

July 2022 – September 2024

- Provided Level 2 Application Management Services (AMS) and production support for enterprise retail and transport applications.
- Provided L2 Application Support and 24/7 production support for enterprise retail and transport applications, ensuring availability and SLA compliance.
- Performed daily morning and afternoon application/server health checks, monitoring application status, services, logs, and system alerts to identify and address issues proactively.
- Managed incidents, service requests, changes, and problem records using ServiceNow, following ITSM and ITIL-aligned processes.
- Troubleshoot application and infrastructure issues using SQL, Windows Server, system logs, and monitoring tools; supported root cause analysis and service restoration.
- Coordinated with IAM, DBA, SQL, Unix, and infrastructure teams to remediate security vulnerabilities across application and database servers.
- Successfully coordinated remediation of 96 security vulnerabilities (VITs) across application environments.
- Supported 20 production changes, 25 CTASKs, 3 problem records, and 218 operational tickets; served as SME for multiple applications and supported Hypercare.

Aruze Global Shared Services | Sto. Tomas, Batangas

Electrical Design Engineer – R&D Hardware Team

Aug 2021 – July 2022

- Designed electrical schematics, block diagrams, and wiring harnesses for gaming machine platforms.
- Used AutoCAD to develop precise electrical layouts, ensuring design-for-manufacture readiness.
- Collaborated with mechanical and software teams to integrate electrical systems into final products.
- Conducted component selection and compliance tests (ESD, thermal, ampere rating) to industry standards.
- Maintained structured design documentation and implemented version control throughout development lifecycle.

Batangas II Electric Cooperative | Lipa City, Batangas

Electrical Engineering Intern

Jan 2018 – May 2018

- Experienced internship training under Engineering Services Design, Section of Facility, Analysis, Research and Development Section (FARDS).
- Drafted electrical feeder and substation layouts using AutoCAD.

Education

Bachelor of Science in Electrical Engineering *Batangas State University* **02/2020** • Major in Renewable Energy Resources Design

Certificates

- **Reinvention with Agentic AI** – Accenture July 2026
- **AZ-900: Microsoft Azure Fundamentals** – Oct 2022
- **DP-900: Microsoft Azure Data Fundamentals** – Jun 2023
- **Registered Electrical Engineer (REE)** – PRC No. 0081060 (May 2022 – December 2025)
